## EDUCATION

### Master Of CSE In AI
**Politecnico Di Milano**
2023 - 2026

### Bachelor of CS
**Sharif University**
2017 - 2022

## SKILLS & EXPERIENCES

Python, Pytorch, Pandas

SQL, Postgres, Postgis

Django, ORM, Template

Celery, RabbitMQ, Redis

Dart - Flutter Web/Android

Git, Claude Code

## LANGUAGE

English - Advanced

Persian - Native

# AMIR HOSSEIN MOHSEN NEZHAD BARAVATI

Developer and Engineer

## ABOUT ME

I am a highly adaptable student with extensive experience in both backend and frontend development, I have served as a lead engineer, showcasing not only technical prowess but also strong leadership skills. My academic journey led to a bachelor's thesis on Image Processing, where I conducted research in applying deep neural networks and machine learning to diagnose thyroid carcinoma. Currently pursuing my Master's degree at Politecnico di Milano (Polimi), I am confident that this experience will be invaluable, providing me with a rich academic environment and opportunities to engage with cutting-edge research and industry trends. With a solid background in software engineering, a robust foundation in mathematics and algorithms, and a commitment to pushing the boundaries of technology, I am always eager to explore new concepts and technologies. This intersection of academic rigor and practical experience positions me to contribute effectively to both theoretical discussions and real-world applications in the field of technology.

## WORK EXPERIENCE

Hamkaran System | Tehran, Iran

### Lead Engineer and Developer
Jul 2021 - Sep 2023

As the lead engineer at SG, I directed the development of projects using Dart/Flutter and Python/Django. Responsible for both Flutter and Django code bases, I led a team of four developers. Additionally, I participated in the hiring process, conducted interviews, and provided mentorship when needed. My experience encompasses the seamless integration of diverse technologies and the fostering of a collaborative team environment.

Nilva | Tehran, Iran
Nov 2020 - May 2021

### Flutter Developer

I was solely responsible for developing and maintaining a Flutter application.

## PROJECTS

Sharif University | Tehran, Iran
Dec 2021 - Sep 2022

### Diagnosis of Thyroid Cancer Using DL from Cytology Slides

Diagnosis of Thyroid Cancer Using Neural Networks from Cytology Slides Description: Independent and collaborative research into the application of deep neural networks and machine learning on the diagnosis of thyroid carcinoma and exploring the potential of computer vision in assisting experts in their work

Sharif University | Tehran, Iran
Sep 2022 - Dec 2022

### Colloquial Meaning and Synonym Extraction

Independent and collaborative research into developing and designing new data pipelines to automatically craft a database of informal words and their corresponding synonym
